Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the claims is that the prior art neither teaches nor fairly suggest a method for forming a channel layer in a thin film transistor comprising a first a-Si layer is formed under a condition of a flux ratio of H_2/SiH_4 being within a range from 0.40 to 1.00 in claims 1-8 and in the context of the recited process.

The primary reason for allowance of the claims is that the prior art neither teaches nor fairly suggest a method of improving the photo leakage current problem of a thin film transistor comprising making the first a-Si layer having more defects than an a-Si layer formed by CVD method under a condition of a flux ratio of H_2/SiH_4 being 5.0 in claims 9-17 and in the context of the recited process.
